

IN THE CLAIMS

Please amend the claims as follows:

1. (currently amended) A fishing chair comprising:

a front frame having an upper end and a lower end;

a back frame having an upper end and a lower end, wherein said back frame is pivotally connected to said front frame;

a chair frame ~~pivotally connected to at least one~~ located in proximity to said upper ends of said front and back frames; and

a stabilization frame ~~pivotally connected to~~ located in proximity to said lower ends of said front and back frames, wherein said stabilization frame is constructed to provide stability for said fishing chair by fictionally engaged said stabilization frame with granular materials when said fishing chair is being placed on said granular materials.

2. (original) The fishing chair of Claim 1, wherein said stabilization frame includes steps having a "┐" cross-section.
3. (original) The fishing chair of Claim 1, wherein said fishing chair further includes a pair of stabilization bars pivotally connected to said front and back frames.
4. (original) The fishing chair of Claim 1, wherein said front frame includes a plurality of steps.
5. (original) The fishing chair of Claim 1, wherein said back frame includes a plurality of steps.

6. (currently amended) The fishing chair of Claim 1, wherein the lengths of said back frame ~~is longer than~~ and said front frame are different.
7. (original) The fishing chair of Claim 1, wherein said fishing chair further includes a detachable personal floatation device securely contained within a personal floatation device frame attached to said back frame.
8. (original) The fishing chair of Claim 1, wherein said fishing chair further includes a fishing pole holder attached to said front frame.
9. (original) The fishing chair of Claim 1, wherein said fishing chair further includes a chair assembly situated on top of said chair frame.
10. (original) The fishing chair of Claim 1, wherein said fishing chair further includes a pair of armrests pivotally connected to said front and back frames at distal ends of said front and back frames.

Please add Claim 11.

11. (new) The fishing chair of Claim 1, wherein said granular materials are sand.
